

Sample Applications of Reinforcement Learning

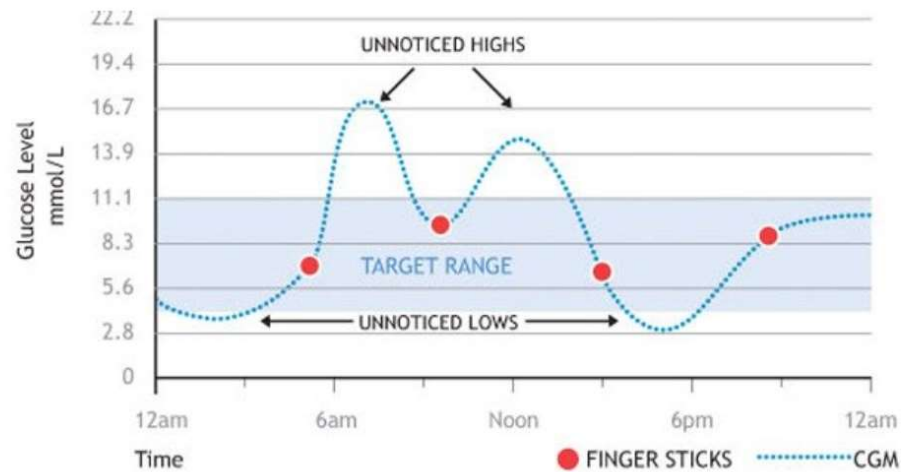

Reinforcement Learning
School of Data Science
University of Virginia

Last updated: January 16, 2024

Medicine

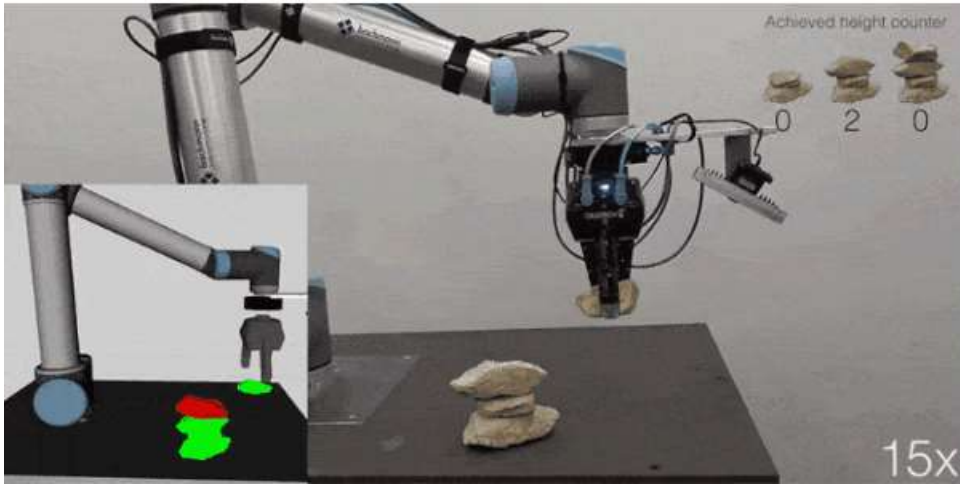

Dynamic Treatment Regimes (DTR) to manage clinical values in a range

Applications for diabetes (graph below), anemia, sepsis, chronic kidney disease mineral bone density

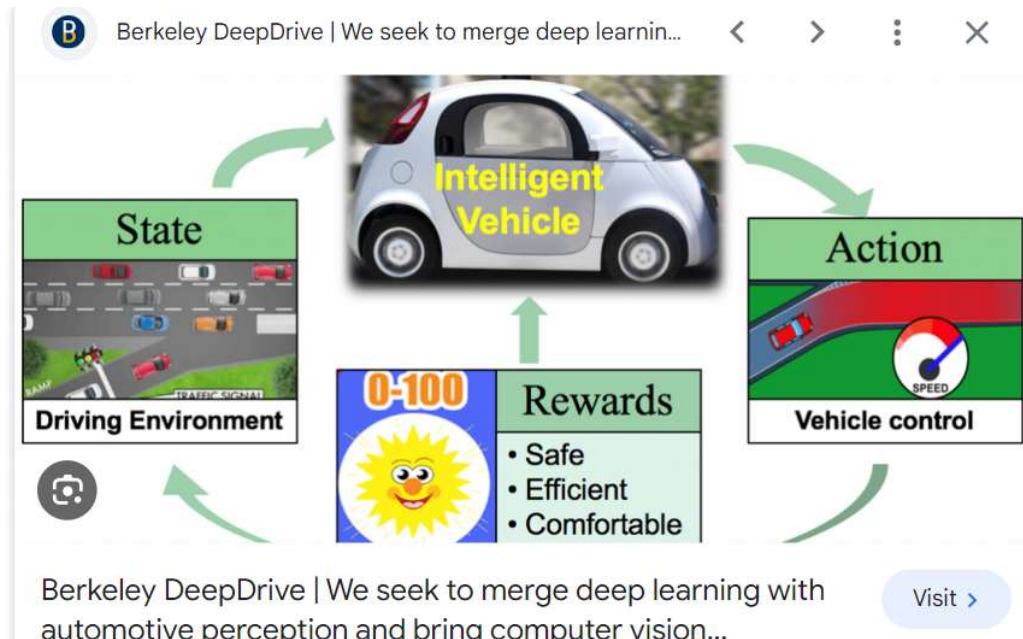

Robotics

Control a **robot** in continuous space with continuous actions

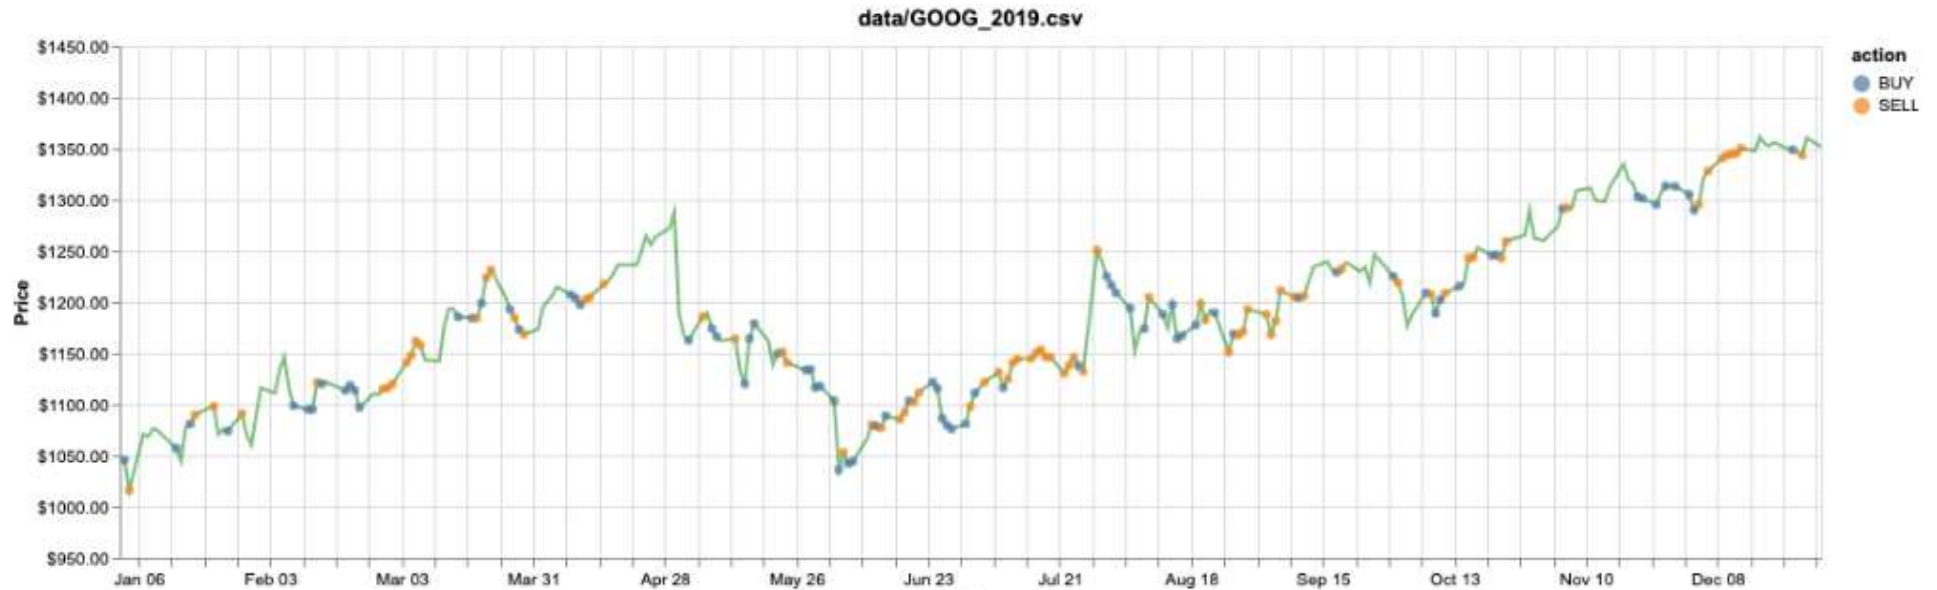

Autonomous Vehicles

Teach vehicles how to navigate safely and efficiently

Finance

Develop trading algorithms that maximize risk-adjusted return

Chatbots

Improve chatbots with feedback from users
